My name is Steven Jackson and I have been a Entrepreneur, network marketer and online marketer for the last 25 years. It ticks all the boxes for me and gives me the financial freedom and a sense of global independence I have always desired, which allows me to choose where and how I live.

My greatest pleasure a part from being with my family and friends is when I can help someone achieve their personal goals and dreams and allow them to understand that they can have financial freedom for themselves and their families.

## THE INTOXICATING DOTERRA AROMA NEAR ME EVERYDAY HAS CHANGE MY LIFE FOREVER!

Watching the realization that it is possible to take control of their lives and support their families, or live in another country or simply buy a new home gives me the ultimate high.

### Action, Goals, Plans, Work and never give up for Success

However, to achieve financial freedom one needs to **take action**, as I did many years ago. This action can come in many forms but ultimately it means making a decision and then following through with it.

Next stage is **setting goals** for yourself, because how will you know when you have achieve anything if you have nothing to calculate your success. One of my personal goals is to move to Spain, my wife and I love the place and the culture and for many years we have dreamed about moving there and because we have that joint desire and passion to achieve that goal we have found that our focus is steady and sure. And the fact is that we have almost achieve that goal.

From the point of setting your goals the next stage is to **formulate a plan** on how to achieve these goals, because without a plan you are planning to fail.

Achieving any goal in life is never so simple but hard work, passion and diligence to **work on it everyday** has been my mantra to success. Rain or shine, good or bad day, I go through my daily list until they are done and then the day might be my own.

Finally and in some ways most importantly, **never give up** People will laugh at you, ridicule you and tell you that it is not possible to be successful from a home based business, but experience has taught me that going back to basics of working hard, being passion and diligence in your desire to achieve your goals is the difference between success and failure.

If you would like to be a part of my success story and become a 21st century Entrepreneur, get back to me on my contact page and we can discuss where you want to go and how you wish to achieve success.
